Introduction Where Opportunity Meets Talent®

The TriMetrix® EQ Coaching Report was designed to increase the understanding of an individual's talents. The report provides insight to three distinct areas: behaviors, motivators and emotional intelligence. Understanding strengths and weaknesses in each of the three areas will lead to personal and professional development and a higher level of satisfaction.

The following is an in-depth look at your personal talents in the five main sections:

Behaviors

This section of the report is designed to help you attain a greater knowledge of yourself as well as others. The ability to interact effectively with people may be the difference between success and failure in your work and personal life. Effective interaction starts with an accurate perception of oneself.

Motivators

This section of the report provides information on the why of your actions, which with application and coaching, can tremendously impact your valuing of life. Once you know the motivations that drive your actions, you will immediately be able to understand the causes of conflict.

Integrating Behaviors And Motivators

This section of the report will help you blend the how and the why of your actions. Once you can understand how your behaviors and motivators blend together, your performance will be enhanced and you will experience an increase in satisfaction.

Emotional Intelligence Section

This section of the report provides information on your emotional intelligence, which with application and coaching, can impact the way you respond to emotionally charged situations. In turn you will increase your performance and decision making.

Blending Behaviors, Motivators And EQ

This section will illustrate the impact your Emotional Intelligence has on your core behavioral style as well as your top two motivators.

Introduction Behaviors Section

Behavioral research suggests that the most effective people are those who understand themselves, both their strengths and weaknesses, so they can develop strategies to meet the demands of their environment.

A person's behavior is a necessary and integral part of who they are. In other words, much of our behavior comes from "nature" (inherent), and much comes from "nurture" (our upbringing). It is the universal language of "how we act," or our observable human behavior.

In this report we are measuring four dimensions of normal behavior. They are:

- How you respond to problems and challenges.
- How you influence others to your point of view.
- How you respond to the pace of the environment.
- How you respond to rules and procedures set by others.

This report analyzes behavioral style; that is, a person's manner of doing things. Is the report 100% true? Yes, no and maybe. We are only measuring behavior. We only report statements from areas of behavior in which tendencies are shown. To improve accuracy, feel free to make notes or edit the report regarding any statement from the report that may or may not apply, but only after checking with friends or colleagues to see if they agree.

*"All people exhibit all four behavioral factors in varying degrees of intensity."
—W.M. Marston*

Behavioral Selling Overview

The Behavioral Selling Overview reflects Sam's natural and adapted styles within each phase of the Behavioral Selling Model. Sam's natural style reflects his native, intuitive selling behavior. Sam's adapted scores reflect the behavior that Sam believes necessary in each phase of behavioral selling.

The level of effectiveness that Sam either possesses naturally or is able to modify or "mask" is also shown. The higher the score, the more effective Sam is at that phase of the sale. The lower the score, the greater challenge Sam has in terms of delivering specific behavior required for success within that phase.

The amount of difference between a salesperson's adapted and natural styles is also key. The greater the difference, the greater potential for stress.

0-5.0=POOR 5.1-6.6=FAIR 6.7-7.6=GOOD 7.7-8.8=VG 8.9-10=EX

Potential Strengths or Obstacles to Behavioral Selling Success

- Present his products or service in a manner that requires the least amount of his effort in terms of any modification or change from his standard presentation.

Influence: What people believe enough, they act upon. This phase is designed to enable the salesperson to build value and overcome the tendency that many prospects have to place little belief or trust in what is told to them. It is this phase of the sale that solidifies the prospect's belief in the supplier, product or service and salesperson.

In the Influence Phase, Sam MAY have a TENDENCY to:

- Not allow enough time for prospect to verbalize his full and honest feelings.
- Use intimidation and his physical presence rather than third party testimonial data or related materials to allow prospect to be convinced of the accuracy of his claims.
- Not have the full array of "happy customer" letters that he should have. Feels he doesn't need them because he can "go it alone."
- :Make claims that are beyond the belief of certain types of buyers. Warning: Make no claims unless they can be backed by fact.

Closing: The final phase of the Behavioral Selling Model. This phase is asking the prospect to buy, dealing with objections, handling any necessary negotiation and completing the transaction to mutual satisfaction.

In the Closing Phase, Sam MAY have a TENDENCY to:

- Use fear as a motive for buying.
- Tackle tough sales problems and bring them to a successful conclusion. He can be very resourceful even when faced with seemingly insurmountable obstacles to success.
- Not answer objections to the buyer's satisfaction.
- Display impatience if the buyer is raising too many objections. He wants to close the sale and move on to the next challenge.

Adapted Style Natural Style

Value to the Organization

This section of the report identifies the specific talents and behavior Sam brings to the job. By looking at these statements, one can identify his role in the organization. The organization can then develop a system to capitalize on his particular value and make him an integral part of the team.

- Challenge-oriented.
- Negotiates conflicts.
- Creative in his approach to solving problems and selling.
- People-oriented.
- Positive sense of humor.
- Challenges the status quo.
- Verbalizes his feelings.
- Optimistic and enthusiastic.
- Change agent--looks for faster and better ways.

Adapted Style Natural Style

Checklist for Communicating

Most people are aware of and sensitive to the ways with which they prefer to be communicated. Many people find this section to be extremely accurate and important for enhanced interpersonal communication. This page provides other people with a list of things to DO when communicating with Sam. Read each statement and identify the 3 or 4 statements which are most important to him. We recommend highlighting the most important "DO's" and provide a listing to those who communicate with Sam most frequently.

Ways to Communicate:

- Read the body language for approval or disapproval.
- Take issue with facts, not the person, if you disagree.
- Ask for his opinions/ideas regarding people.
- Present the facts logically; plan your presentation efficiently.
- Be clear, specific, brief and to the point.
- Stick to business--let him decide if he wants to talk socially.
- Read the body language--look for impatience or disapproval.
- Leave time for relating, socializing.
- Support and maintain an environment where he can be efficient.
- Plan interaction that supports his dreams and intentions.
- Provide a warm and friendly environment.
- Not deal with details, put them in writing, pin him to modes of action.
- Motivate and persuade by referring to objectives and results.

Checklist for Communicating Continued

This section of the report is a list of things NOT to do while communicating with Sam. Review each statement with Sam and identify those methods of communication that result in frustration or reduced performance. By sharing this information, both parties can negotiate a communication system that is mutually agreeable.

Ways NOT to Communicate:

- Reinforce agreement with "I'm with you."
- Legislate or muffle--don't overcontrol the conversation.
- Ramble on, or waste his time.
- Be curt, cold or tight-lipped.
- Be redundant.
- Ask rhetorical questions, or useless ones.
- Let disagreement reflect on him personally.
- Direct or order.
- "Dream" with him or you'll lose time.
- Come with a ready-made decision, and don't make it for him.
- Leave decisions hanging in the air.
- Be dogmatic.

Adapted Style

Natural Style

Selling Tips

This section provides suggestions on methods which will improve Sam's communications when selling to different styles. The tips include a brief description of typical people in which he may interact. By adapting to the communication style desired by other people, Sam will become more effective in his communications with them. He may have to practice some flexibility in varying his communication style with others who may be different from himself. This flexibility and the ability to interpret the needs of others is the mark of a superior salesperson.

When selling to a person who is dependent, neat, conservative, perfectionist, careful and compliant:

- Prepare your "presentation" in advance.
- Stick to business--provide fact to support your presentation.
- Be accurate and realistic--don't exaggerate.

Factors that will create tension:

- Being giddy, casual, informal, loud.
- Wasting time with small talk.
- Being disorganized or messy.

When selling to a person who is ambitious, forceful, decisive, strong-willed, independent and goal-oriented:

- Be clear, specific, brief and to the point.
- Stick to business. Give an effective presentation.
- Come prepared with support material in a well-organized "package."

Factors that will create tension:

- Talking about things that are not relevant to the issue.
- Leaving loopholes or cloudy issues.
- Appearing disorganized.

When selling to a person who is patient, predictable, reliable, steady, relaxed and modest:

- Begin with a personal comment--break the ice.
- Present yourself softly, nonthreateningly and logically.
- Earn their trust--provide proven products.

Factors that will create tension:

- Rushing headlong into the interview.
- Being domineering or demanding.
- Forcing them to respond quickly to your questions.

When selling to a person who is magnetic, enthusiastic, friendly, demonstrative and political:

- Provide a warm and friendly environment.
- Don't deal with a lot of details, unless they want them.
- Provide testimonials from people they see as important.

Factors that will create tension:

- Being curt, cold or tight-lipped.
- Controlling the conversation.
- Driving on facts and figures, alternatives, abstractions.

Descriptors

Based on Sam's responses, the report has marked those words that describe his personal behavior. They describe how he solves problems and meets challenges, influences people, responds to the pace of the environment and how he responds to rules and procedures set by others.

Natural and Adapted Selling Style

Sam's natural selling style of dealing with problems, people, pace and procedures may not always fit the sales environment. This section is extremely important as it will identify if a salesperson's natural style or adapted style is correct for the current sales environment.

PROBLEMS - CHALLENGES

Natural

Sam tends to attack sales challenges in a demanding, driving and self-willed manner. He is individualistic in his approach and will actively seek to achieve sales goals. He likes authority along with his responsibility and a territory that will constantly challenge him to perform up to his ability.

Adapted

Sam sees no need to change his sales approach from his basic style as it is related to solving problems and challenges.

PEOPLE - CONTACTS

Natural

Sam's natural style is to use persuasion and emotion to the extreme. He is positive and seeks to win by the virtue of his oral skills. He will try to convince you that what he is saying is not only right, but is exactly what is needed. He displays enthusiasm for almost everything with every prospect.

Adapted

Sam feels the environment calls for him to be sociable and optimistic. He will trust others and wants a positive environment in which to sell.

Adapted Style Natural Style

Natural and Adapted Selling Style Continued

PACE - CONSISTENCY

Natural

Sam maintains his sense of equilibrium even in the face of extreme time constraints and ever-changing schedules. He is comfortable dealing with a wide variety of customers. His need for high activity level can lead to meeting many new prospects.

Adapted

Sam feels that the sales environment doesn't require him to alter the way he deals with activity level and consistency.

PROCEDURES - CONSTRAINTS

Natural

Sam wants to be seen as his own person who is willing and capable of interpreting the company policies to ensure the best results and allow him creative and innovative methods of selling. He wants to be measured on his sales results, not how he achieved the results.

Adapted

The difference between Sam's basic and adapted sales style is not significant and he sees no need to change on this factor.

Adapted Style Natural Style

Adapted Style

Sam sees his present work environment requiring him to exhibit the behavior listed on this page. If the following statements DO NOT sound job related, explore the reasons why he is adapting this behavior.

- Challenging the status-quo.
- Using an informal sales presentation.
- Impatient to overcome competition.
- Using sales aids in presentation, when he remembers to take them with him.
- Authority to carry out responsibility.
- Adapting easily to changing sales territory.
- Coping easily with many concurrent sales activities.
- A resourceful, eager self-starter.
- Ability to handle many new products or services.
- Positive response to a client's objections.
- Reacting quickly to changes in the sales process or product line.
- Handling a variety of products or services.

Adapted Style

Natural Style

Time Wasters

This section of your report is designed to identify time wasters that may impact your overall time use effectiveness. Possible causes and solutions will serve as a basis for creating an effective plan for maximizing your use of TIME and increasing your PERFORMANCE.

Firefighting

Firefighting is often defined as being pulled away from priority tasks to answer questions, offer solutions, delegate or solve problem-related minor issues. These issues usually "flare up" quickly and are "put out" quickly.

Possible Causes:

- Desire to solve problems quickly and sometimes without adequate information
- Lack of delegation
- Lack of standard operating procedures
- Poor/wrong priorities
- Failure to fit intensity to the situation

Possible Solutions:

- Establish a plan
- Create operational procedures for tasks and known problems
- Establish a "management by objectives" approach

Lack of a Written Plan

A plan in this context may be an overall business plan including mission, goals, objectives, task requirements and utilization of resources. It may also simply mean written priorities and a written daily plan of action.

Possible Causes:

- Action oriented, want to get things done now
- Priorities keep changing (self- or other-imposed)
- Have been successful without a plan in the past
- Want to "go with the flow" and not be stifled by a written daily agenda

Adapted Style

Natural Style

Time Wasters Continued

Possible Solutions:

- Write down personal and job-related values and prioritize them
- Write out a long-term plan that will support those values
- Recognize that by having priorities clearly in mind, constant change will be replaced with change-by-design

Snap Decisions

Snap decisions in this context are those decisions that are made too quickly without having all the necessary information.

Possible Causes:

- Impatience overrides need to wait for more information
- Try to do too much
- Failure to plan in advance
- Lack specific goals

Possible Solutions:

- Ask for recommendations
- Establish process for decisions prior to situation occurring
- Establish standard operating procedures and alternative procedures for possible problems

Crisis Management

Crisis Management is defined as a management style that is consistently driven by uncontrolled external issues as the preferred method of managing. This style allows crises to precipitate rather than anticipating them and being pro-active.

Possible Causes:

- Lack planning
- Place unrealistic time requirements on people and tasks
- Always looking for problems to solve

Adapted Style Natural Style

Time Wasters *Continued*

Possible Solutions:

- Have a well defined operational plan
- Target key individuals to handle specific problems
- Ask for recommendations from key people
- Delegate authority and responsibility when possible

Poor Delegation

Poor delegation usually means the inability to discriminate between tasks needing your time and attention, and those others are capable of accomplishing.

Possible Causes:

- Do not want to give up control
- Do not trust the abilities of others
- Do not understand the abilities of others
- Fear the talents of others
- Do not want to overload others

Possible Solutions:

- Train and mentor others
- Develop a support team
- Give people the opportunity to help
- Recognize the time spent training others on routine tasks will result in gained cumulative time for higher priority tasks

Adapted Style Natural Style

Areas for Improvement

In this area is a listing of possible limitations without regard to a specific job. Review with Sam and cross out those limitations that do not apply. Highlight 1 to 3 limitations that are hindering his performance and develop an action plan to eliminate or reduce this hindrance.

Sam has a tendency to:

- Represent himself with more authority than he may have.
- Be a situational listener--hears only what he wants to hear.
- Become defensive and overreact to certain objections.
- Be weak at providing follow-up service if client has little potential for future sales.
- Dislike routine work--call reports, etc.
- Not have presentation in a logical order.
- Dominate a sales presentation.
- Resist participation as part of the team, unless seen as a leader.
- Take objections lightly.

Behavioral Hierarchy

Your observable behavior and related emotions contribute to your success on the job. When matched to the job, they play a large role in enhancing your performance. The list below ranks your behavioral traits from the strongest to the weakest.

1. Competitiveness - Tenacity, boldness, assertiveness and a "will to win" in all situations.

2. Urgency - Decisiveness, quick response and fast action.

3. Frequent Change - Moving easily from task to task or being asked to leave several tasks unfinished and easily move on to the new task with little or no notice.

4. Frequent Interaction with Others - Dealing with multiple interruptions on a continual basis, always maintaining a friendly interface with others.

5. Versatility - Bringing together a multitude of talents and a willingness to adapt the talents to changing assignments as required.

6. People Oriented - Spending a high percentage of time successfully working with a wide range of people from diverse backgrounds to achieve "win-win" outcomes.

7. Customer Relations - A desire to convey your sincere interest in them.

* 68% of the population falls within the shaded area.

The Success Insights® Wheel

The Success Insights® Wheel is a powerful tool popularized in Europe. In addition to the text you have received about your behavioral style, the Wheel adds a visual representation that allows you to:

- View your natural behavioral style (circle).
- View your adapted behavioral style (star).
- Note the degree you are adapting your behavior.
- If you filled out the Work Environment Analysis, view the relationship of your behavior to your job.

Notice on the next page that your Natural style (circle) and your Adapted style (star) are plotted on the Wheel. If they are plotted in different boxes, then you are adapting your behavior. The further the two plotting points are from each other, the more you are adapting your behavior.

If you are part of a group or team who also took the behavioral assessment, it would be advantageous to get together, using each person's Wheel, and make a master Wheel that contains each person's Natural and Adapted style. This allows you to quickly see where conflict can occur. You will also be able to identify where communication, understanding and appreciation can be increased.

Introduction Motivators Section

Knowledge of an individual's motivators help to tell us WHY they do things. A review of an individual's experiences, references, education and training help to tell us WHAT they can do. Behavioral assessments help to tell us HOW a person behaves and performs in the work environment. The Personal Motivators & Engagement report measures the relative prominence of six basic interests or motivators (a way of valuing life): Theoretical, Utilitarian, Aesthetic, Social, Individualistic and Traditional.

Motivators help to initiate one's behavior and are sometimes called the hidden motivators because they are not always readily observed. It is the purpose of this report to help illuminate and amplify some of those motivating factors and to build on the strengths that each person brings to the work environment.

Based on your choices, this report ranks your relative passion for each of the six motivators. Your top two and sometimes three motivators cause you to move into action. You will feel positive when talking, listening or doing activities that satisfy your top motivators.

The feedback you will receive in this section will reflect one of three intensity levels for each of the six motivators.

- **Strong** - positive feelings that you need to satisfy either on or off the job.
- **Situational** - where your feelings will range from positive to indifferent based on other priorities in your life at the time. These motivators tend to become more important as your top motivators are satisfied.
- **Indifferent** - your feelings will be indifferent when related to your 5th or 6th motivator.

Your Personal Motivators Ranking		
1st	Theoretical	Strong
2nd	Utilitarian	Strong
3rd	Individualistic	Situational
4th	Social	Situational
5th	Traditional	Indifferent
6th	Aesthetic	Indifferent

Social

Those who score very high for this motivator have an inherent love of people. The social person prizes other people and is, therefore, kind, sympathetic and unselfish. They are likely to find the Theoretical, Utilitarian and Aesthetic attitudes cold and inhuman. Compared to the Individualistic motivator, the Social person regards helping others as the only suitable form for human relationships. Research indicates that in its purest form, the Social interest is selfless.

- Sam will definitely attempt to help an individual or group overcome a predicament, but only if they have "touched the right chords" within him.
- Sam's desire to help others (even to his own detriment) or decision not to help others, is reviewed on an individual basis.

Traditional

The highest interest for this motivator may be called "unity," "order," or "tradition." Individuals with high scores for this motivator seek a system for living. This system can be found in such things as conservatism or any authority that has defined rules, regulations and principles for living.

- In many cases, Sam will want to set his own rules which will allow his own intuition to guide and direct his actions.
- He will not be afraid to explore new and different ways of interpreting his own belief system.
- Sam's passion in life will be found in one or two of the other dimensions discussed in this report.
- Traditions will not place limits or boundaries on Sam.
- Sam can be creative in interpreting other systems or traditions and selective in applying those traditions.
- He will work within a broadly defined set of beliefs.
- It may be hard to manipulate Sam because he has not defined a philosophy or system that can provide immediate answers to every situation.

Aesthetic

A higher Aesthetic score indicates a relative interest in "form and harmony." Each experience is judged from the standpoint of grace, symmetry or fitness. Life may be regarded as a procession of events, and each is enjoyed for its own sake. A high score here does not necessarily mean that the incumbent has talents in creative artistry. It indicates a primary interest in the artistic episodes of life.

- He wants to take a practical approach to events.
- Intellectually, Sam can see the need for beauty, but has difficulty buying the finer things in life.
- He is a very practical person who is not sensitive to being in harmony with his surroundings.
- Sam's passion in life will be found in one or two of the other motivators discussed in this report.
- The utility of "something" is more important than its beauty, form and harmony.
- Sam is not necessarily worried about form and beauty in his environment.
- Unpleasant surroundings will not stifle his creativity.

Navigating Situations Outside Your Comfort Zone

The information on this page will highlight areas in which you may struggle relating to based on your lowest motivator. The information will teach you how to manage your way through discussions focusing on your number six motivator.

Tips for Communicating with "High Aesthetic" utilizing your Theoretical.

As you read through the communication tips, think about the following questions:

How does the mindset of a high Aesthetic contribute to today's workforce?

How do Aesthetics contribute to the world, your professional life and your personal life?

A person with a high Aesthetic is interested in studying and appreciating the totality of a situation.

- Connect the common need to look at problems from a holistic viewpoint. Understand one viewpoint is through the objective data analysis versus that of the Aesthetic, which is from a subjective, or feeling related, standpoint.
- Ask questions to bring the Aesthetic perspective into reality, and utilize visuals in order to influence them. Partner with them in order to visually represent shared opinions.

A person with a high Aesthetic will have a strong interest in preserving the balance and harmony of the organization.

- Provide the high Aesthetic with information and data to substantiate why decisions that may disrupt the balance need to be made at times. Assist with bringing the objective to the subjective
- Understand that a harmonious organization is more likely to be comfortable with the vulnerability that comes with the need for continuous learning. If fear is present in the organization, it will be less likely to get new information to spread through the company.

Navigating Situations Outside Your Comfort Zone

A person with a high Aesthetic is in tune with his or her inner feelings and likes surroundings that compliment these feelings.

- Maximize the Aesthetic's ability to beautify educational components, training facilities and other aspects of the continuous learning initiatives of the organization in order to make people feel at ease and open to learning.
- Work with the Aesthetics to present ideas, data and information in a way that people can not only hear what's being said, but visualize it and relate to it. This will help ideas move forward faster.

Form and harmony are key in providing a high Aesthetic with an experience to remember.

- Understand that the Aesthetic receives the same motivation and reward from the journey or the experience as a Theoretical does from learning something new. How can the parties work together to be sure to bring information back to the organization?
- Prior to presenting findings, work with the Aesthetic to be sure proper credit and explanation are being given to the journey, not just the findings. Connect with the team members that want to know the whole picture.

Motivators - Norms & Comparisons

For years you have heard statements like, "Different strokes for different folks," "to each his own," and "people do things for their own reasons, not yours." When you are surrounded by people who share similar motivators, you will fit in with the group and be energized. However, when surrounded by people whose motivators are significantly different from yours, you may be perceived as out of the mainstream. These differences can induce stress or conflict. **When confronted with this type of situation you can:**

- Change the situation.
- Change your perception of the situation.
- Leave the situation.
- Cope with the situation.

This section reveals areas where your motivators may be outside the mainstream and could lead to conflict. The further away you are from the mainstream on the high side, the more people will notice your passion about that motivator. The further away from the mainstream on the low side, the more people will view you as indifferent and possibly negative about that motivator. The shaded area for each motivator represents 68 percent of the population or scores that fall within one standard deviation above or below the national mean.

Norms & Comparisons Table - Norm 2011

- 68 percent of the population - national mean - your score

Mainstream - one standard deviation of the national mean
Passionate - two standard deviations above the national mean
Indifferent - two standard deviations below the national mean
Extreme - three standard deviations from the national mean

Motivators - Norms & Comparisons

Areas in which you have strong feelings or passions compared to others:

- You have an intense passion for learning new things, always searching for opportunities to advance your knowledge. Others may struggle with the amount of time and resources you are willing to invest to learn new things. They might think you should stop learning and start doing.
- You strive for efficiency and practicality in all areas of your life, seeking to gain a return on your investment of time, talent and resources. Others may feel you always have a string attached and are always trying to gain a personal advantage. They may feel you should give just for the sake of giving.

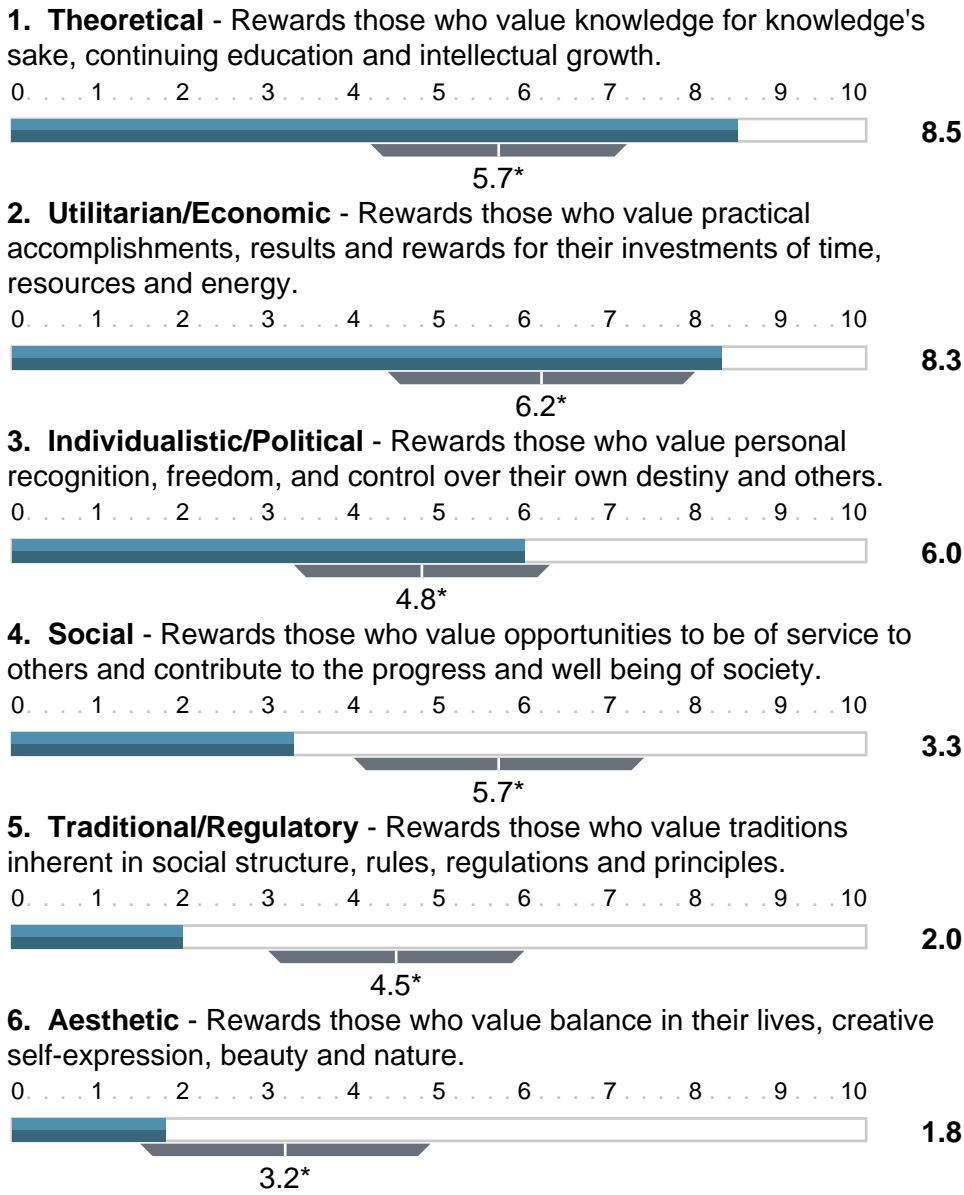

Areas where others' strong feelings may frustrate you as you do not share their same passion:

- Your self-reliance will cause you to feel uncomfortable around people who are always trying to help you or be too nice to you.
- Others who try to impose their way of living on you will frustrate you. Your ability to try new things frustrates them and they feel compelled to change you to their system.

Motivators Hierarchy

Your motivation to succeed in anything you do is determined by your underlying motivators. You will feel energized and successful at work when your job supports your personal motivators. They are listed below from the highest to the lowest.

MI: 63-62-23-32-48-24 (THE.-UTI.-AES.-SOC.-IND.-TRA.)
* 68% of the population falls within the shaded area.

Introduction Integrating Behaviors and Motivators Section

The ultimate power behind increasing job satisfaction and performance comes from the blending of your behaviors and motivators. Each individually is powerful in order to modify your actions, but the synergy of blending the two moves you to a whole new level.

In this section you will find:

- Potential Behavioral and Motivational Strengths
- Potential Behavioral and Motivational Conflict
- Ideal Environment
- Keys to Motivating
- Keys to Managing

Potential Behavioral and Motivational Strengths

This section describes the potential areas of strengths between Sam's behavioral style and top two motivators. Identify two to three potential strengths that need to be maximized and rewarded in order to enhance on-the-job satisfaction.

- Thrives on the challenge of solving problems.
- Uses knowledge to support his position.
- Has an entrepreneurial mindset.
- Very creative in solving problems.
- Willing to share knowledge to benefit the team or organization.
- Motivates others to continue education.
- Optimistic in process improvement.
- Resourceful and influential in creating effective results.

Keys to Motivating

This section of the report was produced by analyzing Sam's wants. People are motivated by the things they want; thus wants that are satisfied no longer motivate. Review each statement produced in this section with Sam and highlight those that are present "wants."

Sam wants:

- A friendly work environment.
- Participation in meetings on future planning.
- Public recognition of his ideas and results.
- Challenging problems where his knowledge and research capabilities can be maximized.
- Complete information in bulleted format for his own investigation.
- Praise for his knowledge base and research capabilities.
- Recognition for solid use of resources and investments.
- Freedom to include others in the celebration of achievements.
- Freedom to get desired results through efficiency and a "can do" attitude.

Keys to Managing

In this section are some needs which must be met in order for Sam to perform at an optimum level. Some needs can be met by himself, while management must provide for others. It is difficult for a person to enter a motivational environment when that person's basic management needs have not been fulfilled. Review the list with Sam and identify 3 or 4 statements that are most important to him. This allows Sam to participate in forming his own personal management plan.

Sam needs:

- Better organization of record keeping.
- To mask emotions when appropriate.
- Help on controlling time and setting priorities.
- To understand that all battles cannot be conquered through assertiveness and expression of knowledge.
- A manager that realizes that he wants to learn new ways to solve problems and make decisions.
- Seek out ways to organize thoughts in order to effectively convey the desired information.
- To manage enthusiasm in order to be an effective listener.
- To assess the risk and rewards of each decision.
- To be an active listener instead of dominating the discussion.

Introduction Emotional Intelligence Section

The Emotional Quotient™ report looks at a person's emotional intelligence, which is the ability to sense, understand and effectively apply the power and acumen of emotions to facilitate higher levels of collaboration and productivity. The report was designed to provide insight into two broad areas: Intrapersonal and Interpersonal emotional intelligence.

Research shows that successful leaders and superior performers have well developed emotional intelligence skills. This makes it possible for them to work well with a wide variety of people and to respond effectively to the rapidly changing conditions in the business world. In fact, a person's (EQ) emotional intelligence may be a better predictor of success performance than intelligence (IQ).

This report measures five dimensions of emotional intelligence:

Intrapersonal emotional intelligence

What goes on inside of you as you experience day-to-day events.

Self-Awareness is the ability to recognize and understand your moods, emotions and drives, as well as their effect on others.

Self Regulation is your ability to control or redirect disruptive impulses and moods and the propensity to suspend judgment to think before acting.

Motivation is a passion to work for reasons that go beyond money or status and a propensity to pursue goals with energy and persistence.

Interpersonal emotional intelligence

What goes on between you and others.

Empathy is your ability to understand the emotional makeup of other people.

Social Skills is a proficiency in managing relationships and building networks.

Is the report 100% true? Yes, no and maybe. We are only measuring emotional intelligence. We only report statements from areas in which tendencies are shown. To improve accuracy, feel free to make notes or edit the report regarding any statement from the report that may or may not apply, but only after checking with friends or colleagues to see if they agree.

General Characteristics

Based on Sam's responses, the report has selected general statements to provide a broad understanding of his level of emotional intelligence.

Self-Awareness

- When faced with a difficult decision, he is usually able to avoid emotionally-based hesitation and confusion.
- Clearly identifies his emotional reactions to life situations.
- Predicts and anticipates his emotional reactions to events.

Self-Regulation

- When in a bad mood, he may brood about it.
- May introduce unnecessary conflict when working with others.
- May have fallen into a habit of using ineffective emotional-regulation strategies.

Motivation

- Will tend to challenge others at times when they are ready to settle for mediocre results.
- He generally will not allow objections or obstacles to keep him from achieving his goals.
- Generally sees challenges more as opportunities rather than obstacles.

Empathy

- Relatively skilled at deciphering the emotional tone of most interactions.
- His ability to gauge the emotional response of others enhances his ability to work with people.
- Generally is able to empathize with others, even when he has not been there himself.

Social Skills

- Generally deciphers nonverbal clues in any interaction.
- Has the ability to network, which may create future opportunities.
- He generally sees the connection between his actions and the impact they have on others.

Emotional Quotient Assessment Results

The Emotional Quotient (EQ) is a measure of your ability to sense, understand, and effectively apply the power and acumen of your emotions and the emotions of others in order to facilitate high levels of collaboration and productivity. Your overall score on the Emotional Quotient Assessment indicates your level of overall emotional intelligence. The higher the number, the more emotionally intelligent you are. If your goal is to raise your EQ, the components on which you have scored the lowest should be the focus of your development.

1. SELF-AWARENESS - The ability to recognize and understand your moods, emotions and drives, as well as their effect on others.

2. SELF-REGULATION - The ability to control or redirect disruptive impulses and moods and the propensity to suspend judgment and think before acting.

3. MOTIVATION - A passion to work for reasons that go beyond money or status, and a propensity to pursue goals with energy and persistence.

4. EMPATHY - The ability to understand the emotional makeup of other people.

5. SOCIAL SKILLS - A proficiency in managing relationships and building networks.

* 68% of the population falls within the shaded area.

Interpersonal Social Skills

A proficiency in managing relationships and building networks.

You scored a 8.4.

You are able to find common ground with others and generally are able to build good rapport. You are able to help build a strong team environment.

What you can do:

- Consider traits you admire in other people you know and ask them for feedback about yourself in those areas.
- Identify areas of social interactions that may make you uncomfortable and ask a trusted advisor to help improve in these areas.
- Consider the unique capabilities of those you interact with and how you can further encourage these traits in them.
- Pursue quality, rather than quantity, in your social bonds. Converse with others on an even deeper level.
- Remember unique facts about others. Use memory techniques and be fondly known as the one that remembers!
- Take notice when emotions are taking over an interaction, and then find ways to improve the emotional tone of the situation.
- Talk about your feelings related to work as well as personal circumstances with a trusted advisor, family member or friend.
- Find ways to be a positive influence at work by helping others improve their social skills.
- If you have a miscommunication or negative interaction, take accountability quickly and find ways to make amends.
- Demonstrate a curiosity about others and their well being and consider ways you may be of assistance.
- Consider ways you may be able to provide positive feedback to help others improve their social skills.
- Join a professional association or special interest group that meets regularly to practice building bonds.

Introduction Blending Behaviors, Motivators and EQ for Success

Maximizing the effectiveness of one's behavioral style can be a difficult maze to navigate in the workplace, especially in situations where "behavioral labels" are assigned. Often a team will have multiple people with the same behavioral styles faced with the same situation, yet they come across differently.

For years, TTI has educated the corporate world on behaviors, or the "how" of people's actions; meanwhile, motivators drive those actions, or "why" they do what they do. This has explained the difference in actions for decades. However, recent research has led to the discovery of people with similar behaviors and motivators, yet they still respond differently to situations, especially when the situations are emotionally charged.

Why is this? The answer is often found within a person's Emotional Intelligence. Understanding a person's EQ and applying this information to behaviors and motivators can not only expand the working language and communication of an organization, but can help an individual successfully navigate the workplace maze and feel a sense of accomplishment and reward from doing so.

Blending Behaviors, Motivators and EQ for Success

Sam has a high level of Social Skills. He is able to proficiently manage relationships and build networks. He is able to inspire and guide groups through nurturing relationships and his ability to create group synergy. Sam has a unique ability to build relationships with all types of people, whereas the majority of individuals build the best relationships with people that have like motivators. His Theoretical and Utilitarian drivers are still his primary areas of interest; however, he is able to set these aside in order to form relationships that don't directly lead to the satisfaction of these passions. Behaviorally, Sam prefers a more direct and to the point communication style. Based on his well-developed Social Skills, he will be able to adapt his communication style to meet the needs of the relationship.
